

# InstallShield 2010

How the world installs software on Microsoft Windows

The World's #1 Installation Product—InstallShield technology is deployed by over 71,000 customers on more than 500 million desktops.

## Support the Latest

Technologies — As a Microsoft Gold Certified Partner, we work closely with Microsoft to support new technologies like Windows 7, MSI 5, and App-V.

More than Desktops—Extend your installations to configure database servers and Web services.

Install on Mobile Devices— Easily target PDAs, smartphones, and more

Multilingual Support—Support for 35 languages makes it easy for you to target customers around the world.

Two Licensing Options—Buy InstallShield as a node-locked or concurrent license.

Available in Three Editions and Two Languages—Premier, Professional, and Express Editions available in English and Japanese.

"InstallShield 2010 is awesome. I'm extremely excited about the new Microsoft App-V support. I strongly recommend upgrading to InstallShield 2010."

Software

If your software targets Windows®, InstallShield® is your solution. It makes it easy to author reliable Windows Installer (MSI) and InstallScript installations and App-V<sup>TM</sup> virtual packages for Windows platforms, including the new Windows 7, keeping your customers happy and your support costs down.

#### InstallShield 2010: The Best Is Even Better

Simply put, InstallShield 2010 is the InstallShield our users have always wanted. It includes over 400 new and improved features from customer requests, including a revamped IDE, superior IIS tools, virtual machine detection, Unicode support, and much more. And of course it supports all the latest Microsoft® technologies like Windows 7, Windows Server 2008 R2, and MSI 5. (Learn more on the back.)

For customers who haven't upgraded in a while, InstallShield 2010 is the version you've been waiting for. And if you've never tried InstallShield, now's the perfect time.

### New App-V Support for Virtual Packages

InstallShield is once again revolutionizing installations with new support for Microsoft App-V<sup>TM</sup>. Now when you build an MSI, InstallShield 2010 can simultaneously build it as an App-V virtual package. It can also convert your legacy MSIs to App-V packages in minutes. The new App-V support is ideal for creating conflict-free product evals and for companies adopting application virtualization in their own environments. Try it now and see.

# The Choice for Targeting Windows Desktops and More

For over 20 years, InstallShield has been the standard for installing on Windows desktops, servers, Web apps, and mobile devices.

• Easily create Windows 7 Logo Certified setups.

- Get support for Microsoft's latest products, including Visual Studio 2010, .NET Framework 4.0, MSBuild, and DirectX® 9.0c.
- Expand installations to servers and Web services, including IIS 7.0, Oracle, MySQL, SQL Server 2008 SP1, and Windows Server 2008 R2.
- Target mobile devices with support for Windows Mobile 6.x, Windows Embedded CE 6.x, SQL Server Compact Edition 3.5 SP1, and PalmOS 3.5 and later.

#### The Easy Way to Build Reliable, Flexible Setups

InstallShield makes it easy to create professional installations for even the most complex products, giving them a superior first impression.

- Tailor the look and feel of installation dialogs with the Visual Dialog Editor and new Adobe® Flash® support.
- InstallScript gives you maximum flexibility in your installations.
- Maintain a clean build system with the Standalone Build.
- Simplified patch and upgrade creation, debugging, and build report tools substantially increase installation quality.

## Cut Your Setup Development Time in Half

Although InstallShield is loaded with powerful capabilities, it's still simple to use. It has time-saving features that help you meet tight deadlines.

- InstallShield's revamped IDE with dynamic searching and filtering, automated wizards, templates, and prebuilt objects save you significant time.
- The Project Assistant walks you step-by-step through the setup creation process, helping you avoid errors.
- The InstallShield Best Practices Validation Suite helps you avoid issues that can cause lengthy delays.
- A single InstallShield setup can present text in up to 35 languages, no manual translation needed.

# Why InstallShield Users Are Upgrading to InstallShield 2010

	InstallShield	InstallShield	InstallShield	InstallShield
Features	2010	2009	2008	12
NEW! App-V Support Deploy your applications as App-V virtual packages that run without conflict.	<b>Ø</b>			
NEW! Windows 7 and MSI 5 Support				
Get a head start on supporting Windows 7 and Windows Server 2008 R2 and build setups that leverage the new features of Windows Installer 5.
